

Lake of the Woods Chapter of PEO Bursary

Please be advised that the Lake of the Woods (LOW) Chapter of Professional Engineers Ontario (PEO) is again offering a \$500 bursary to each of 2 selected North-Western Ontario graduating high school students that will be enrolling in an accredited engineering degree program in the Fall. Please note that preference will be given to students enrolling in an Ontario University but that won't necessarily rule out a student attending elsewhere, since historically the number of applications have been limited. A decision has been made by PEO's headquarters, so that the bursaries are now going to be offered on a recurring annual basis to 2 students in the area (Kenora, Dryden, Red Lake, Sioux Lookout, Fort Frances, Rainy River or Atikokan) that will be selected by the LOW Chapter of PEO based on their application (which is attached) that includes a short (200 word) essay on the Role of the Engineer in Society. (It is perhaps noteworthy that the essay question has often been the deciding factor in determining the award recipient).

Please have any interested students complete the application and email it to: mpokharel@kenora.ca by no later than May 20. The selection committee will meet the following week end and notify the respective school of our selection by June 2nd. We will attempt to have a representative from PEO present the award at the graduation ceremony.

Thank you for your assistance I this matter.

Yours truly,

Mukesh Pokharel, M.A.Sc., P. Eng.
